Atlas CX

Organic wireframe atlas

A warm editorial public page. A clear, practical working application.

Four exact viewport widths - 1440, 1024, 700 and 390 px - are mapped on every screen sheet. These are vector wireframes, not working screens or product screenshots.

Read this atlas

01 Public story

Landing preview and continuous-field composition

02 Staff work

Overview, customers, context, inbox, activity, knowledge, follow-ups and settings

03 Customer access

A simple portal with personal request visibility

04 States and accessibility

Focus, forms, messages, evidence and honest fallbacks

Exact palette

ground	surface	ink
primary	field	art
muted	highlight	secondary

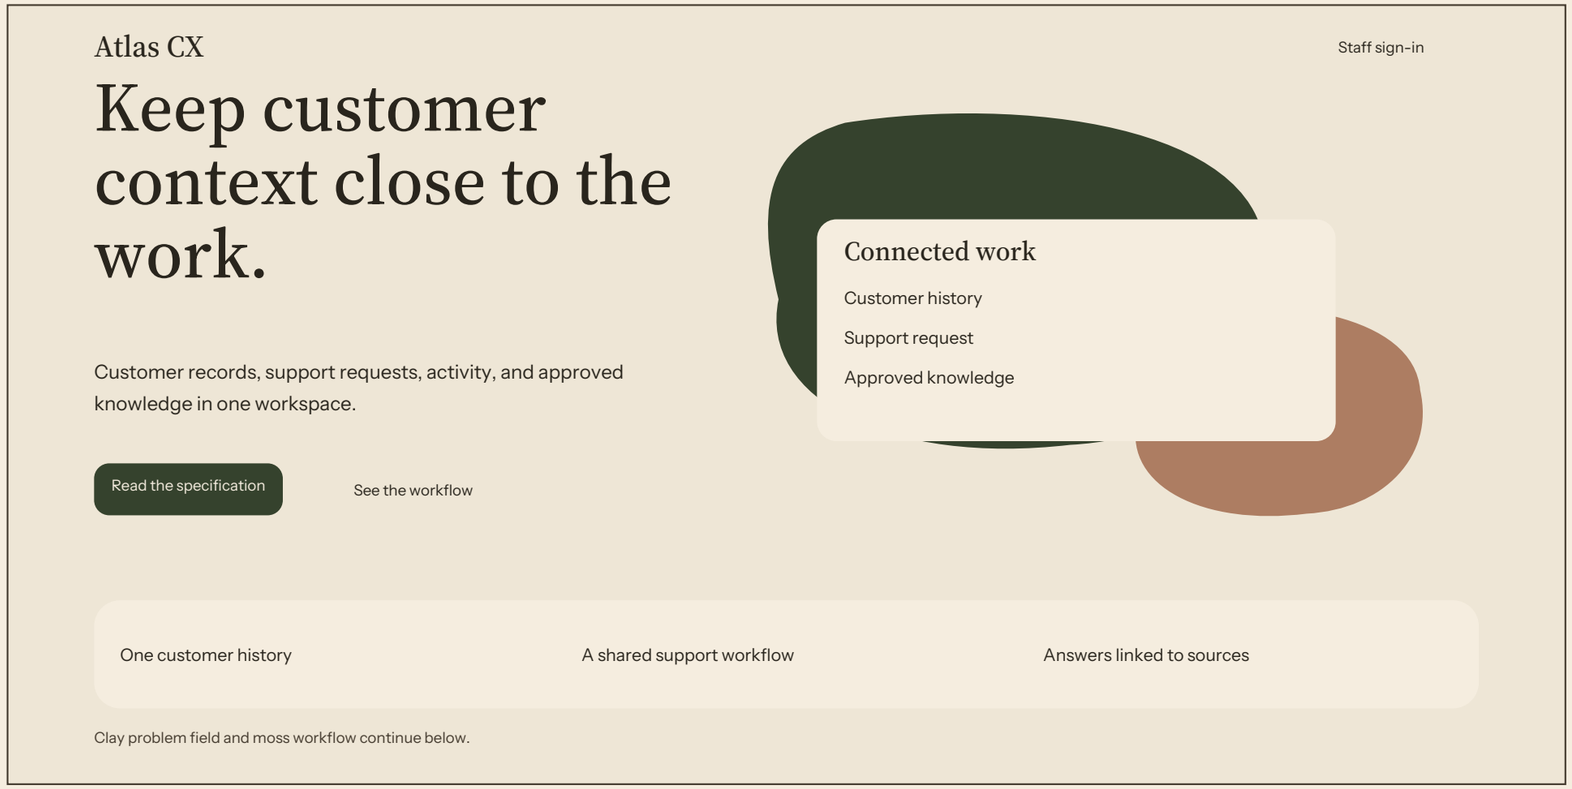

Fonts embedded

Source Serif 4

Instrument Sans

Landing page

1440 px / scrollable view

Layout notes

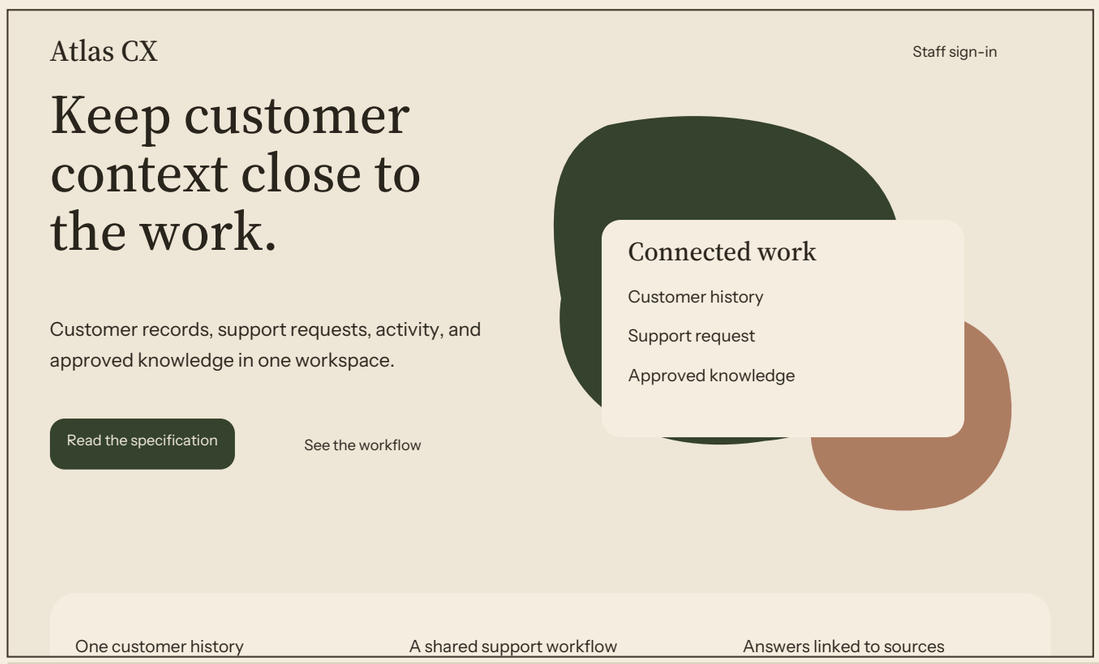

01 Editorial copy is read before decorative shapes.

02 This preview links to the specification; a demo CTA is used only when sign-in works.

03 Clay problem field, moss workflow and industry rows continue below.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

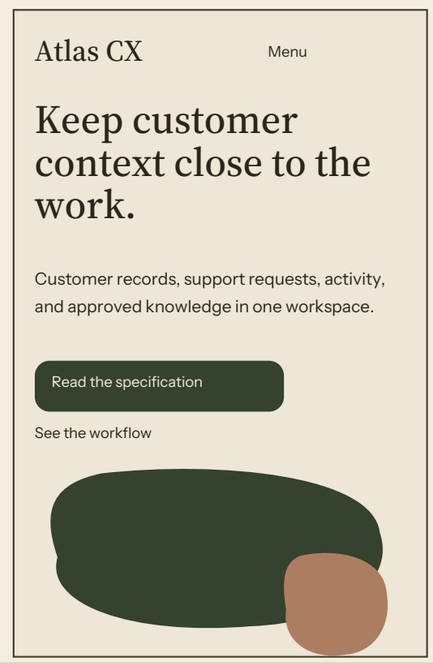

1024 px / scrollable view

700 px / scrollable view

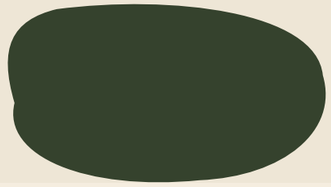

390 px / scrollable view

Landing page - full composition map

L01 Header + editorial split opening

Compact serif statement
Clear actions, then still organic forms

L02 Scope tray: three non-numeric capabilities

L03 Problem and proposed solution

L04 Connected capabilities: open ruled lists

L05 Support workflow: four numbered steps

01 Request / 02 Context / 03 Knowledge / 04 Follow-up

L06 Design preview / genuine screenshot when available

L07 Industry applications: five broad rows

L08 Closing action + quiet footer

Wide composition

Asymmetry belongs to the public story. Align text and actions to stable columns.

At 700 px and below

Stack the reading first, then art and supporting detail. Remove tray overlap and text rotations.

Continuous fields

Clay and moss remain broad grouped sections. Do not turn them into repeated isolated cards.

Honest imagery

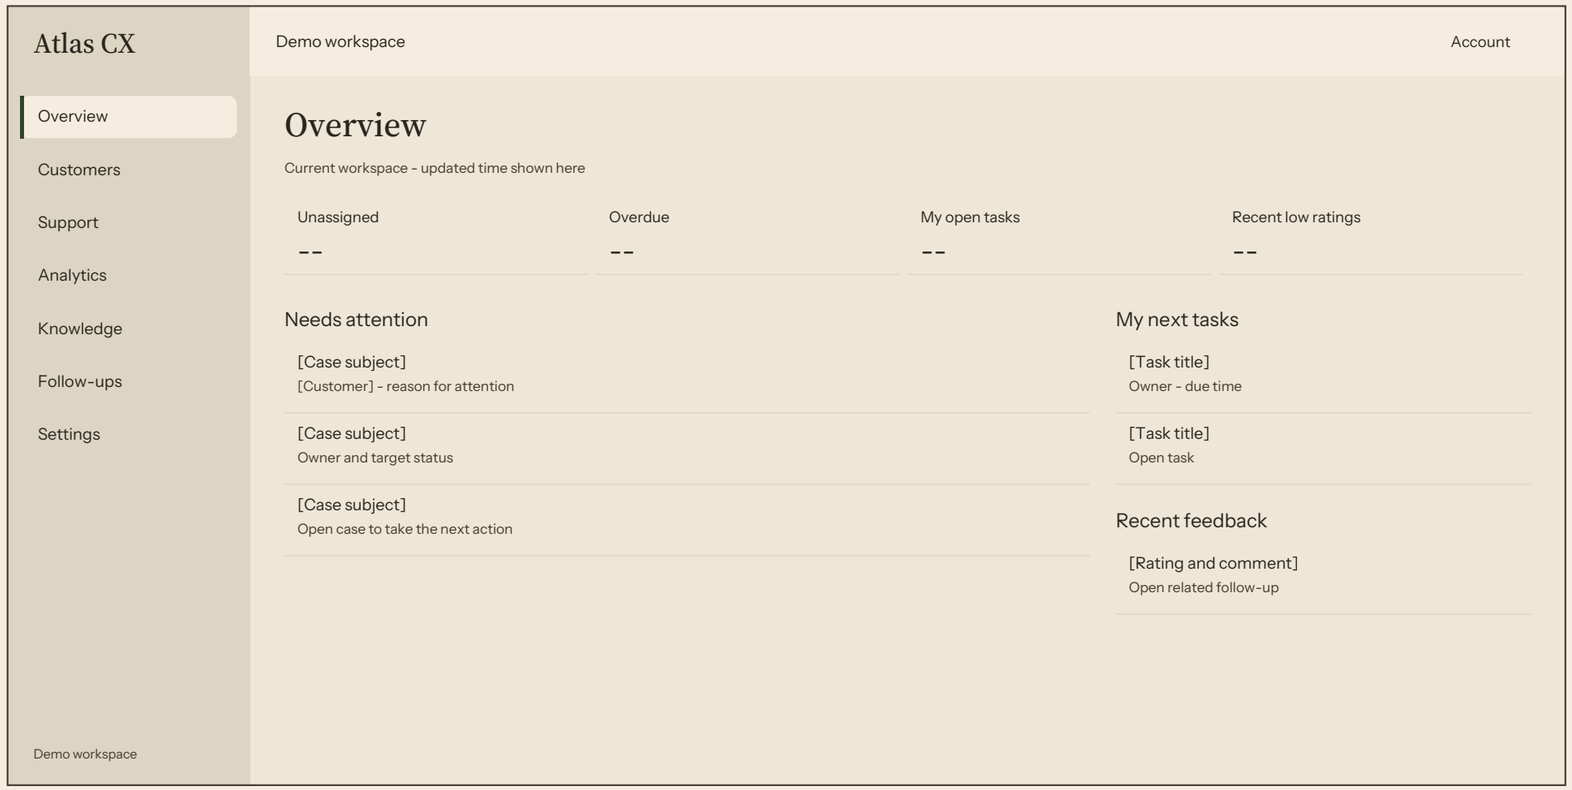

Wireframe preview is labelled Design preview. Use Product screenshot only when the application exists.

No dead CTA

Until a demo is deployed, link to the specification. No fake registration or contact submission.

Overview

1440 px / scrollable view

Layout notes

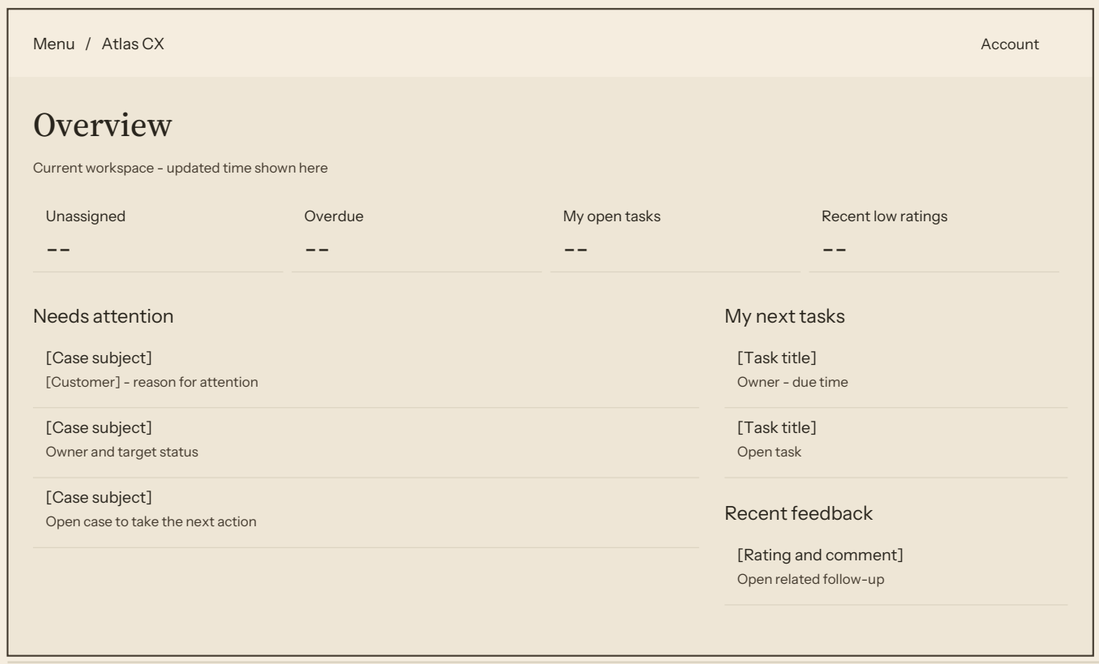

01 One ruled summary strip, not a card grid.

02 Numbers are deliberately blank placeholders.

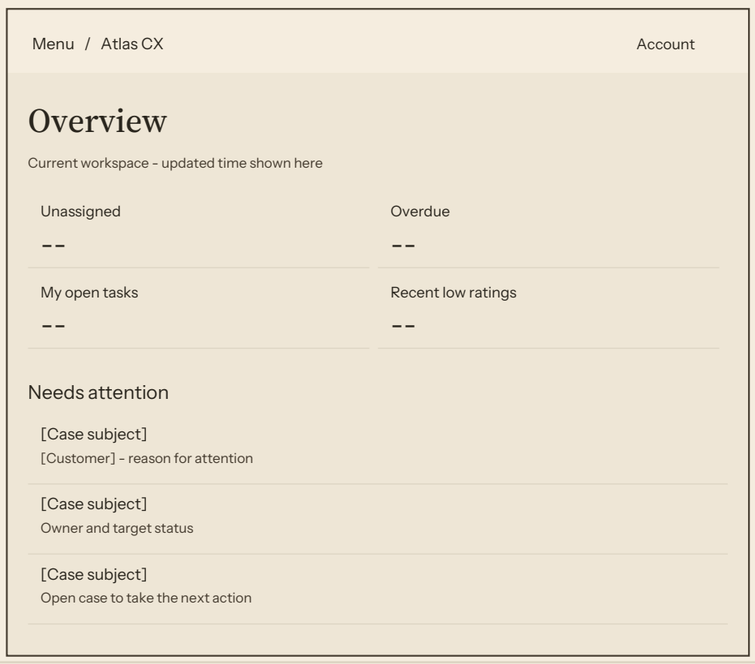

03 At 700 and 390 px the work lists stack.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

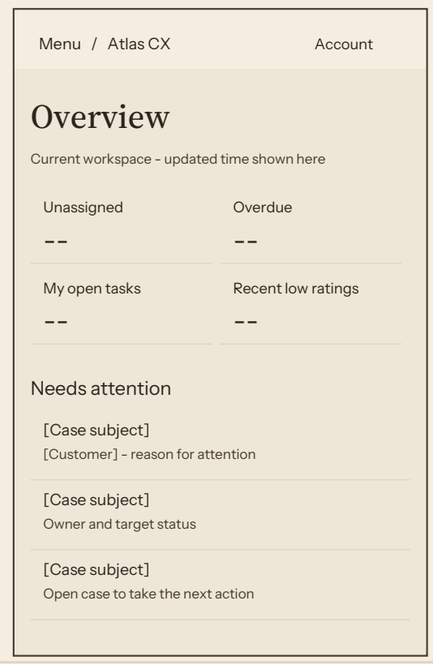

1024 px / scrollable view

700 px / scrollable view

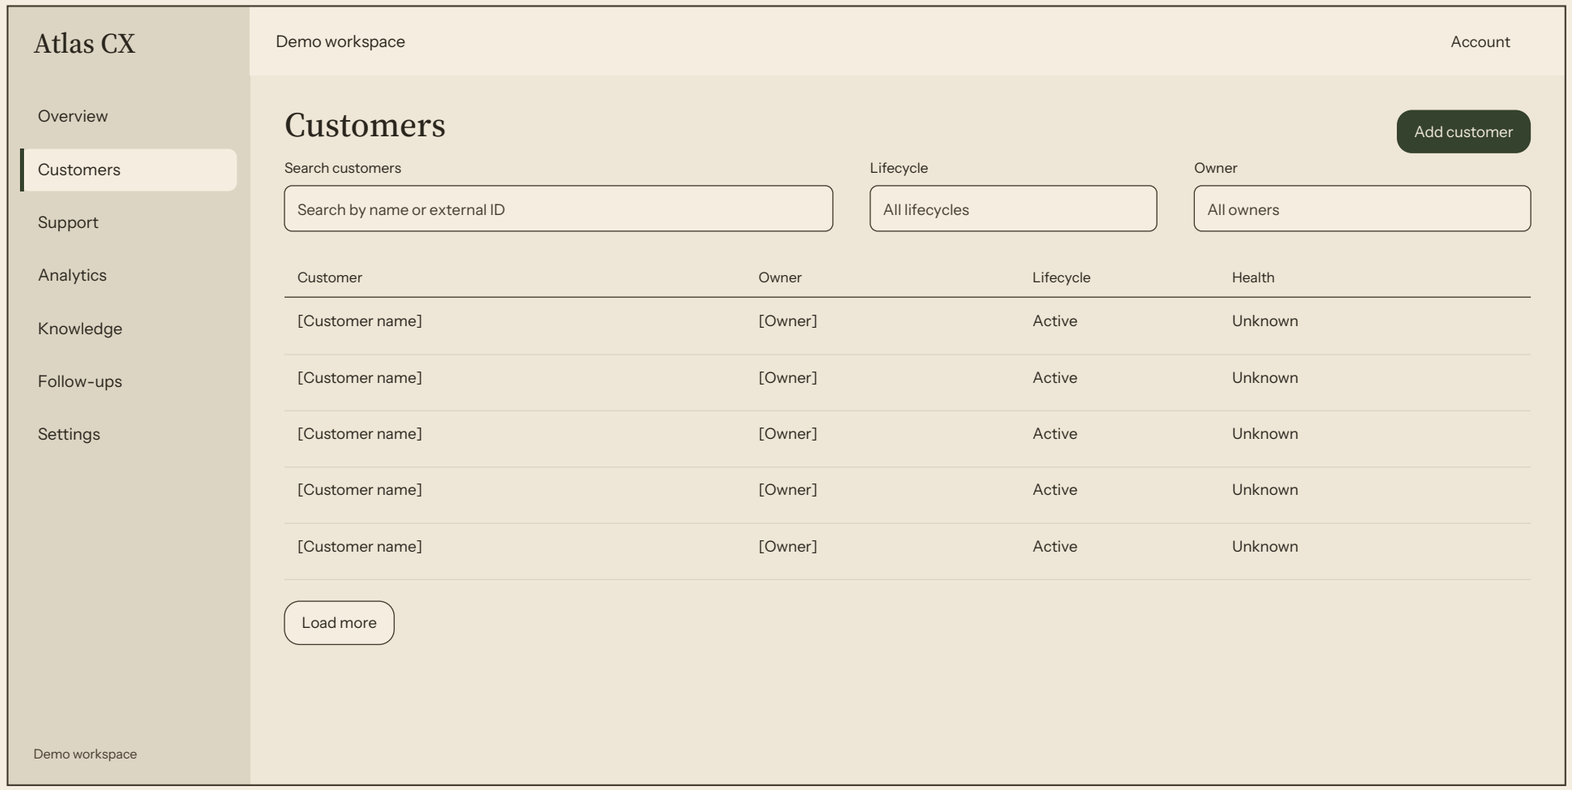

390 px / scrollable view

Customers

1440 px / scrollable view

Layout notes

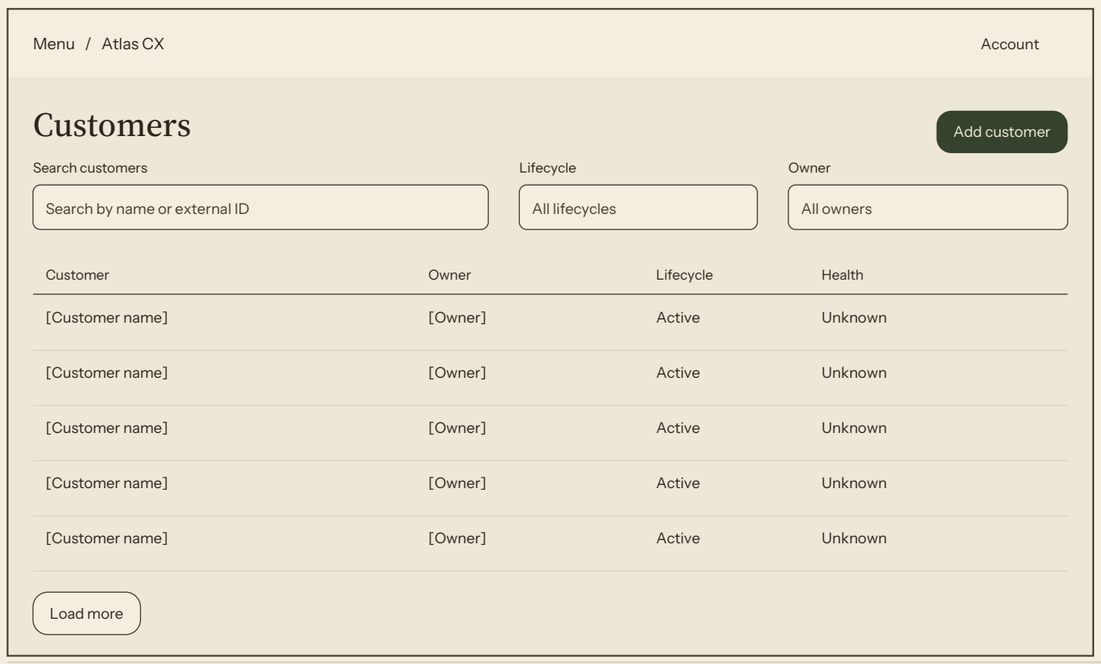

01 Customer name is the primary link.

02 Narrow layouts use labelled record summaries.

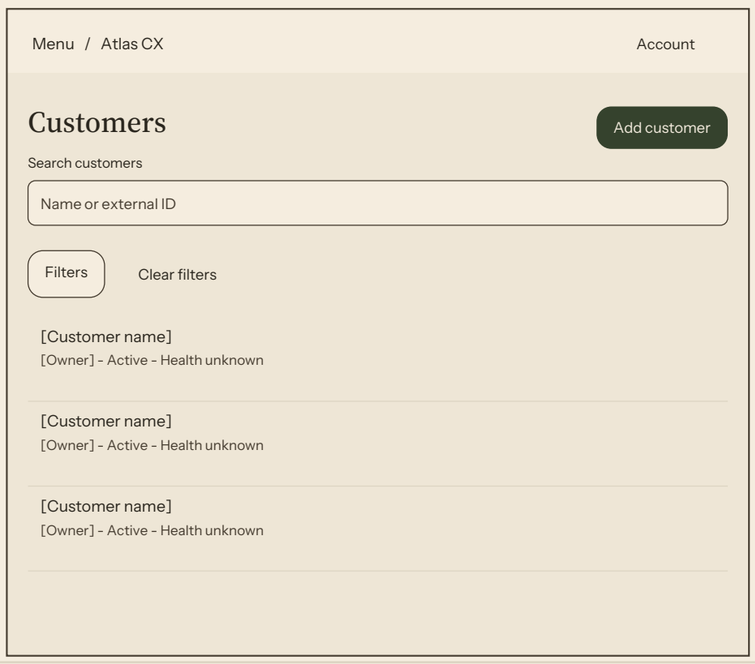

03 CSV import has validate, preview, commit and result states.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

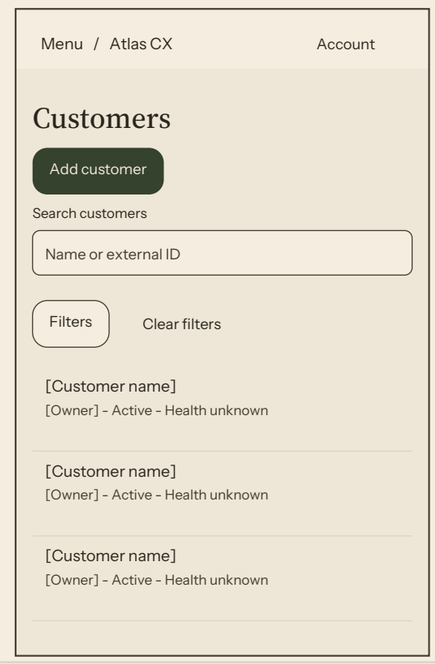

1024 px / scrollable view

700 px / scrollable view

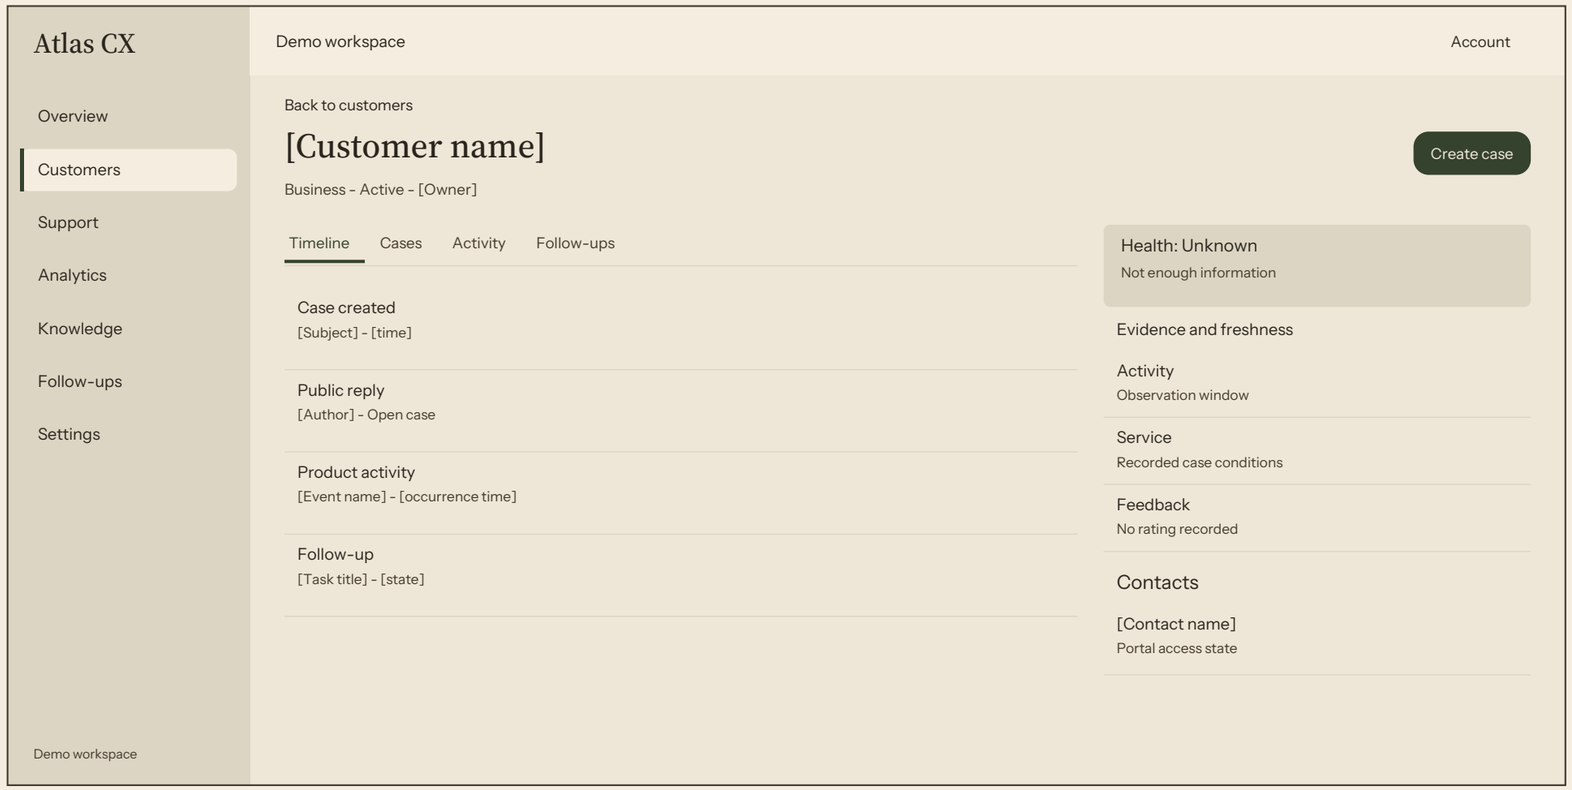

390 px / scrollable view

Customer 360

1440 px / scrollable view

Layout notes

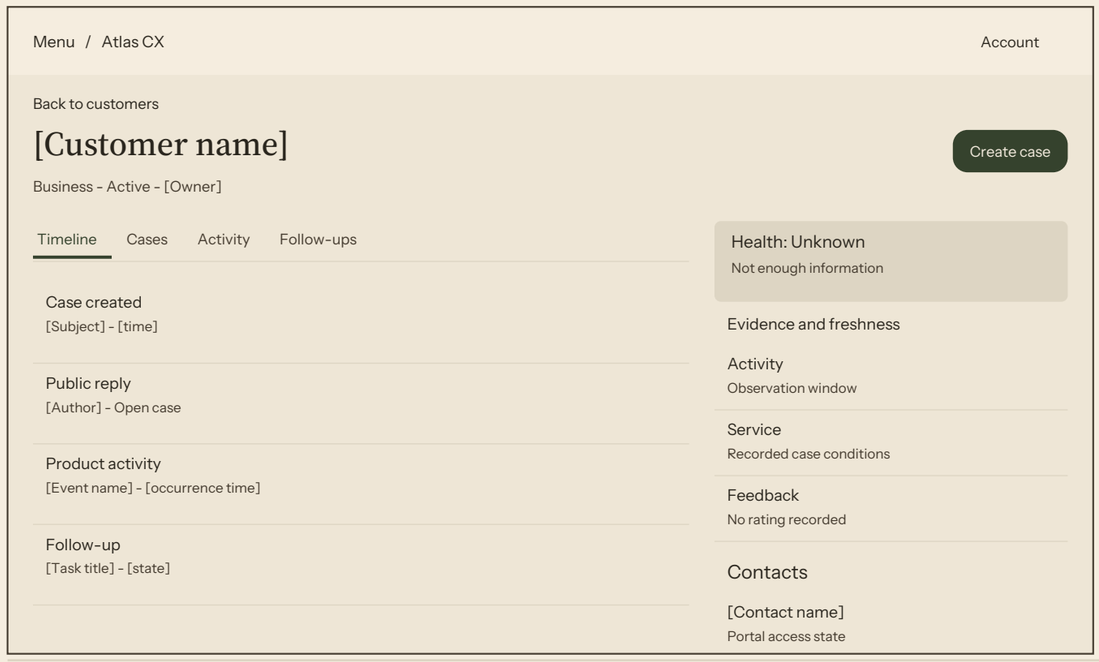

01 Health includes coverage, freshness and missing evidence.

02 Timeline remains the main reading surface.

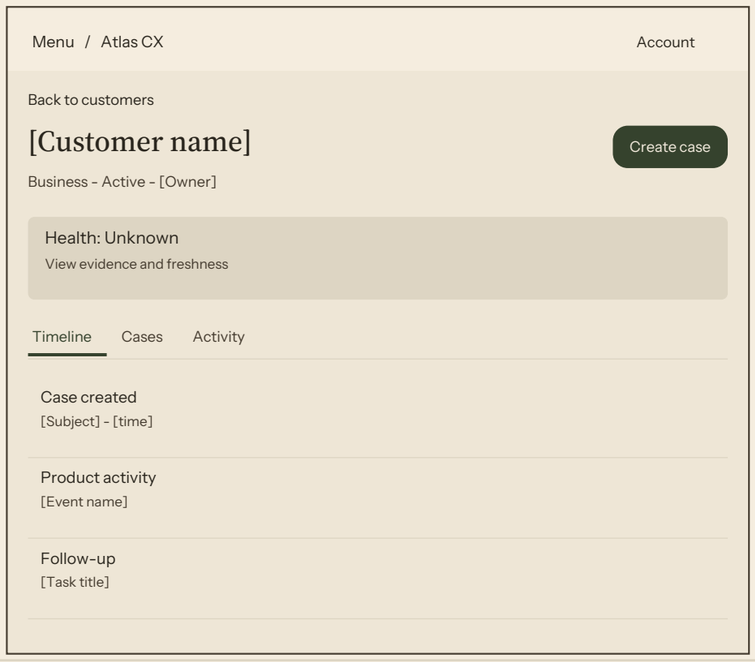

03 Contacts and evidence remain available after stacking.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

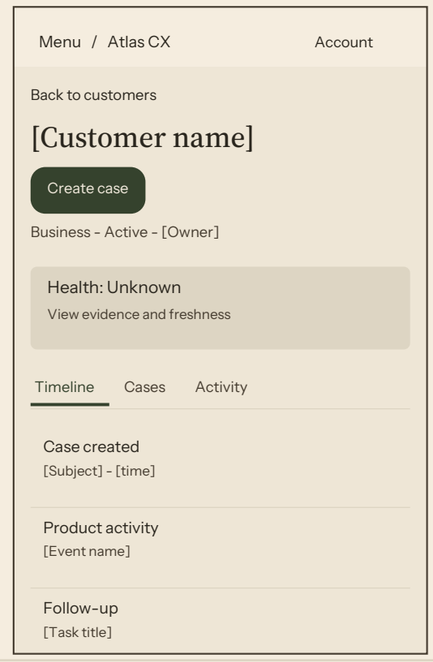

1024 px / scrollable view

700 px / scrollable view

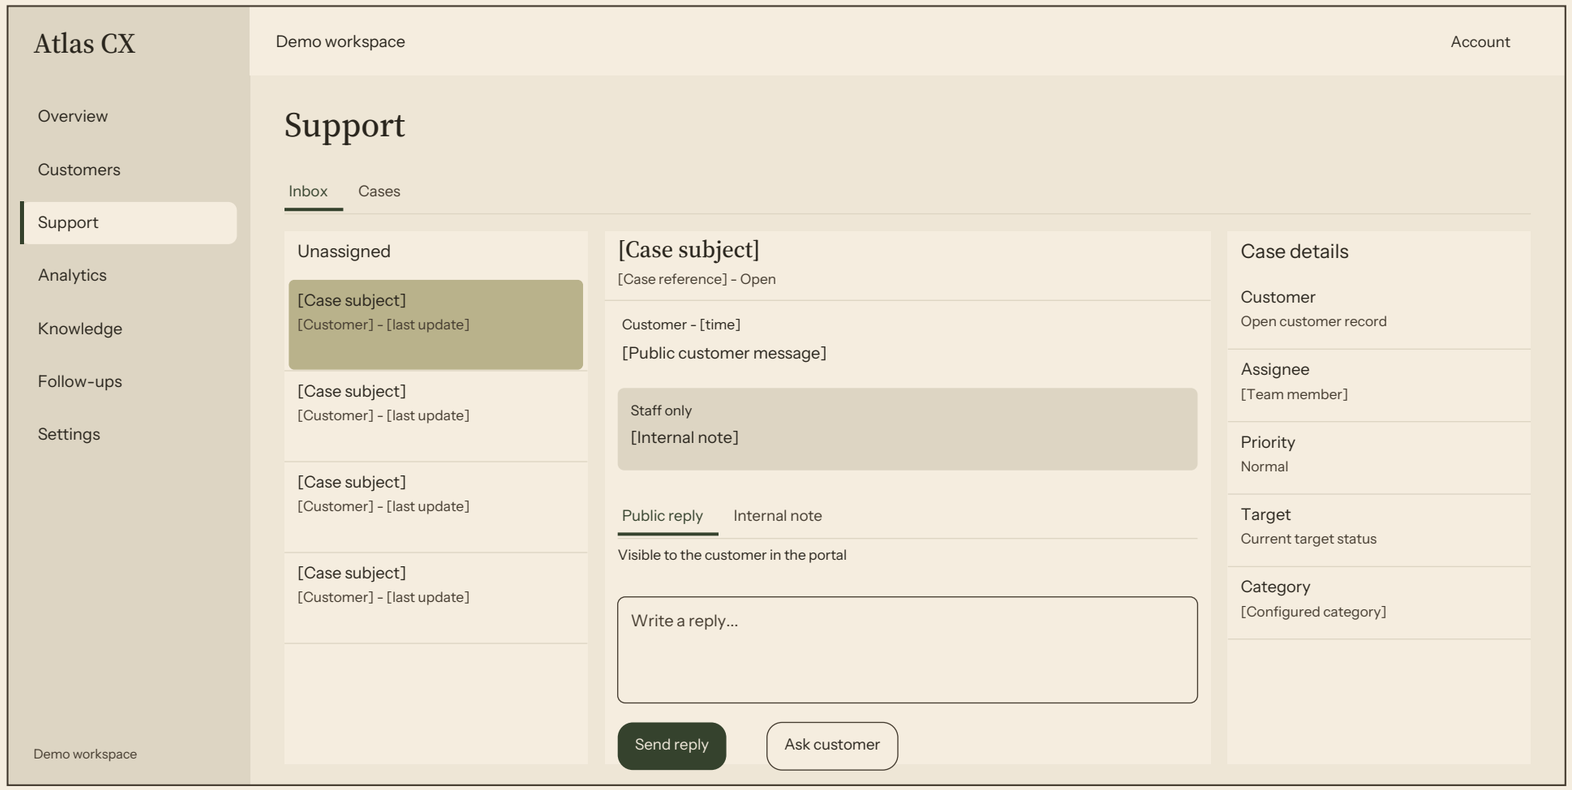

390 px / scrollable view

Support Inbox

1440 px / scrollable view

Layout notes

01 1440 px: 280 / 560 / 280 px panes.

02 1024 px: list + conversation; Details replaces context.

03 700 / 390 px: separate list and detail routes. Public reply and note remain distinct.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

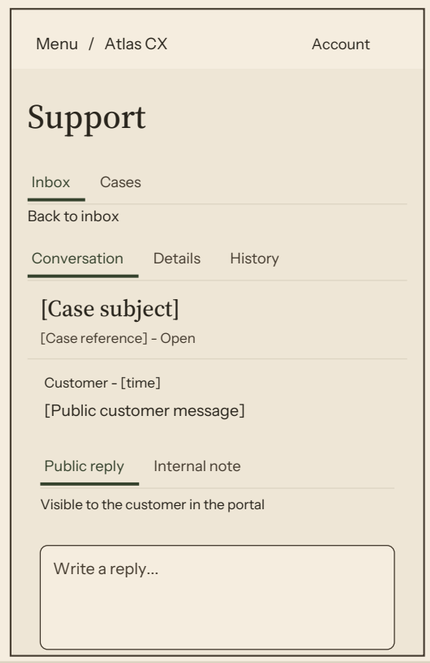

1024 px / scrollable view

700 px / scrollable view

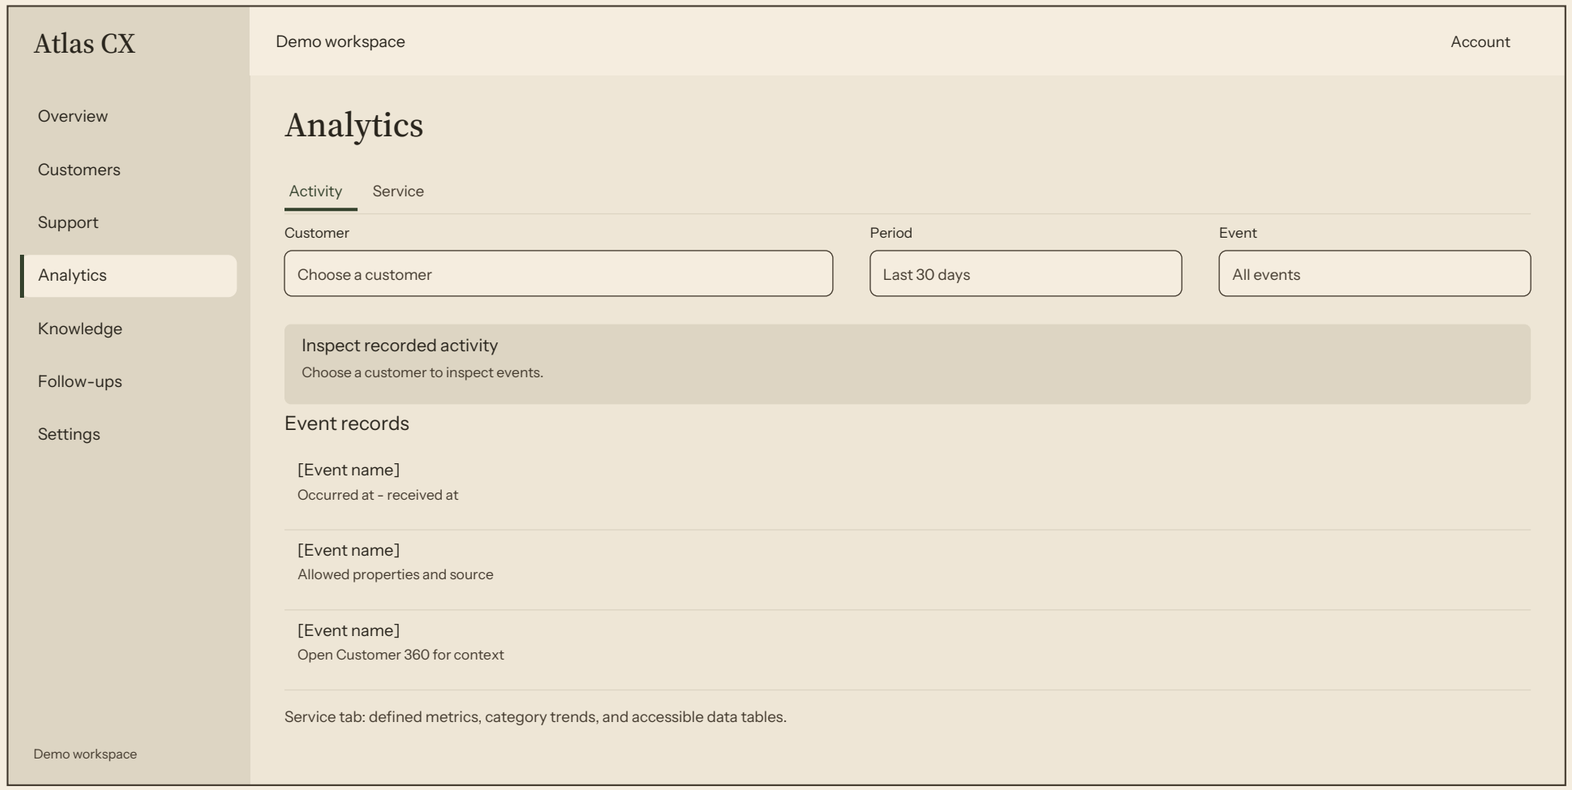

390 px / scrollable view

Activity Analytics

1440 px / scrollable view

Layout notes

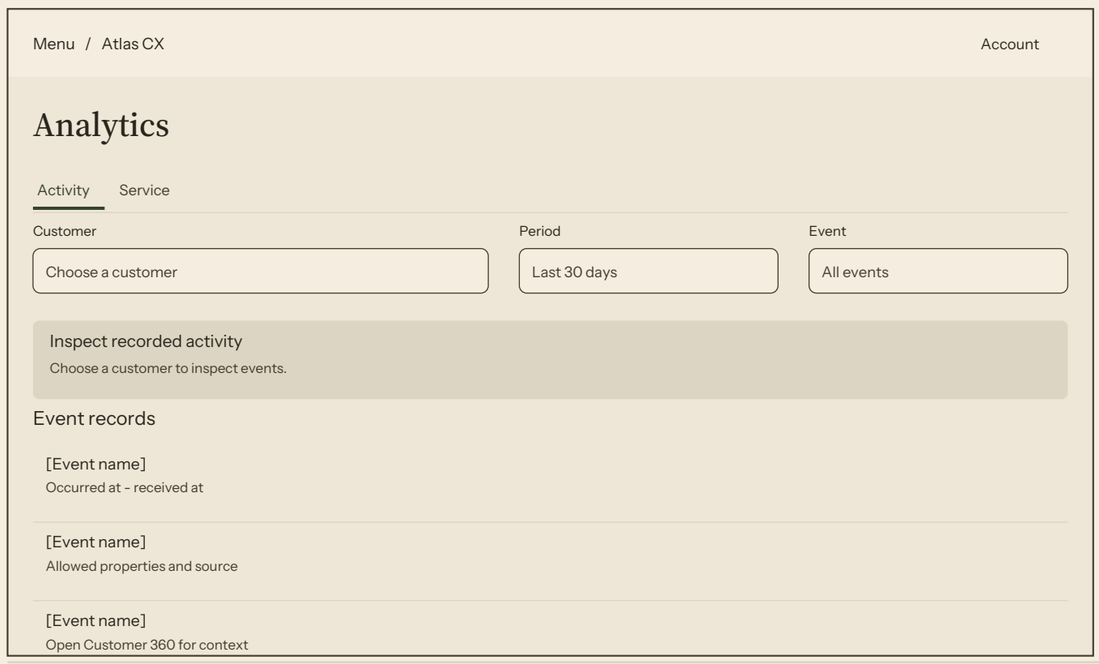

01 MVP Activity view is customer-scoped event inspection.

02 Service tab uses the defined backend metrics and denominators.

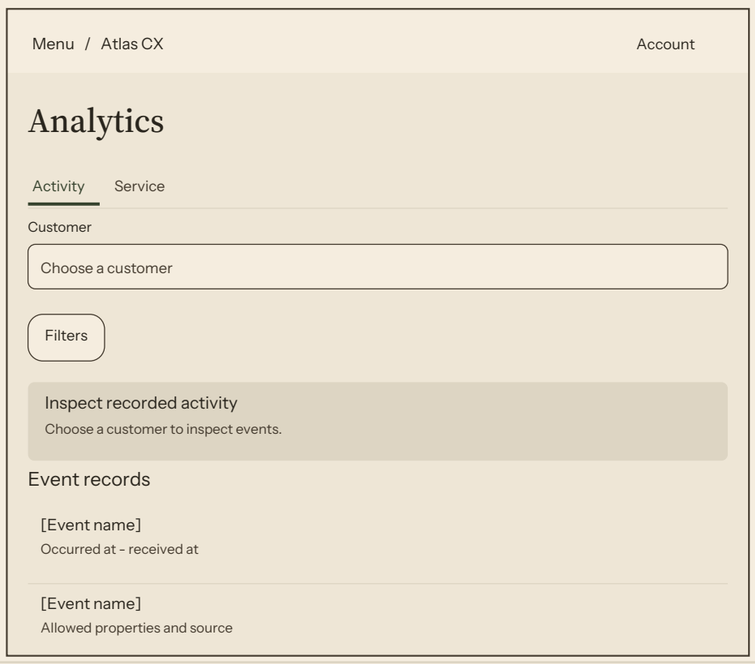

03 No invented event aggregation, chart values or trend lines.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

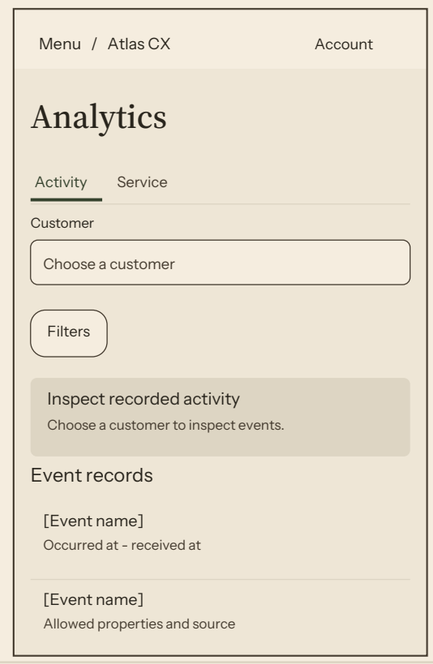

1024 px / scrollable view

700 px / scrollable view

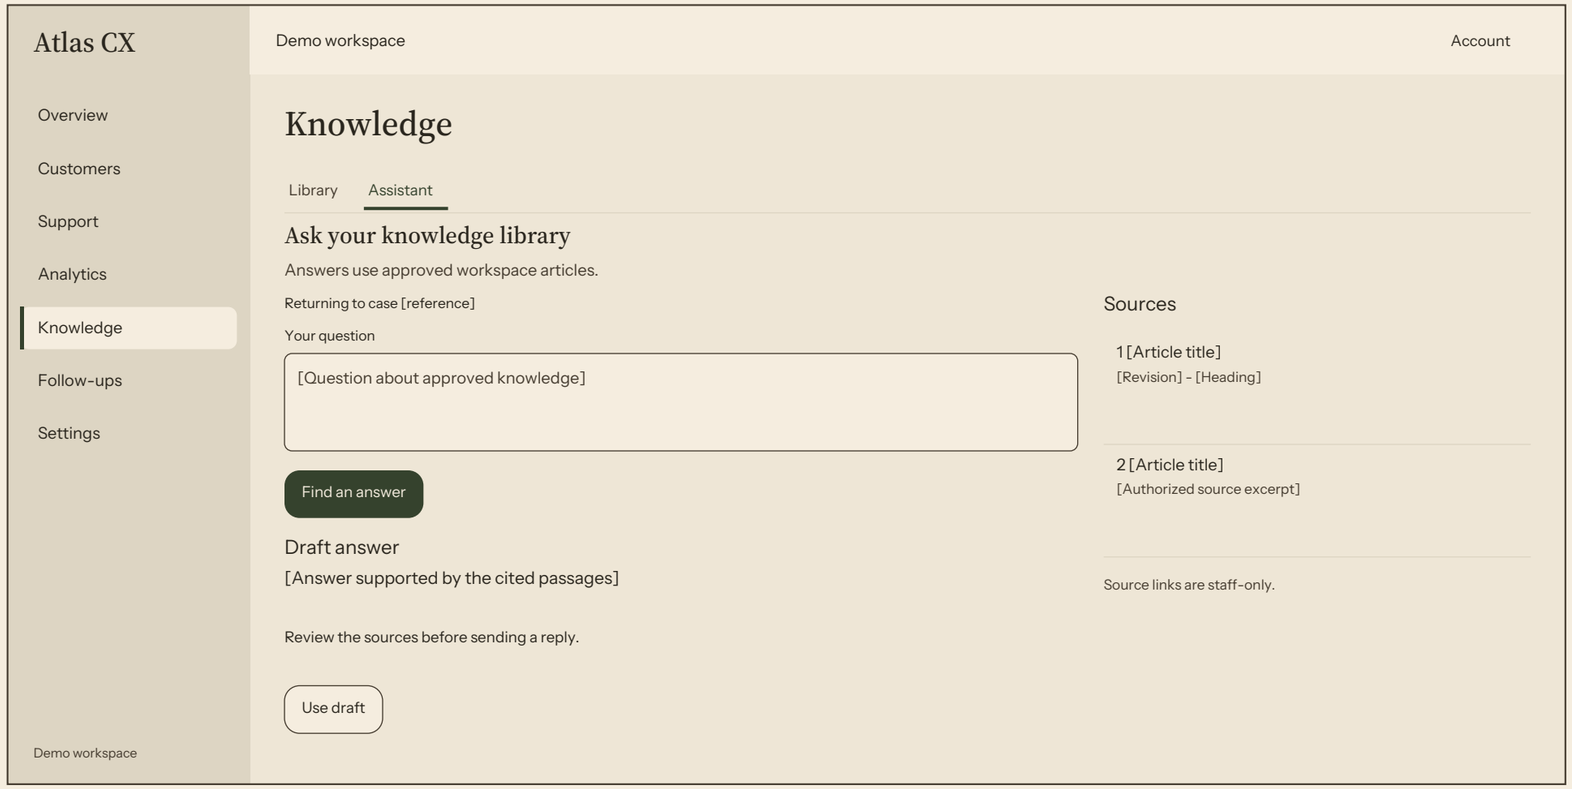

390 px / scrollable view

Knowledge and RAG

1440 px / scrollable view

Layout notes

01 Question and answer precede source reading.

02 Use draft copies to an unsent composer; it never sends.

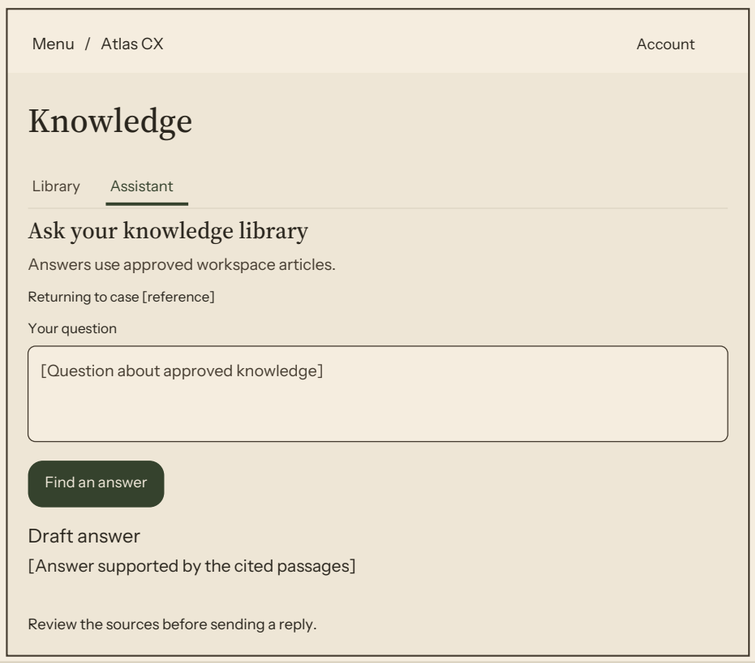

03 Source-only, abstention and source-change states are explicit.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

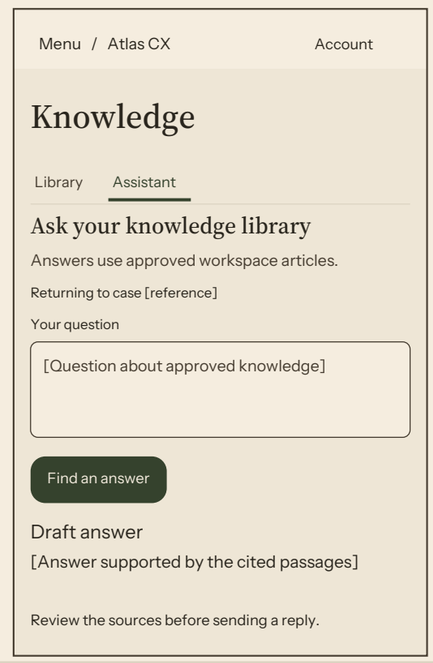

1024 px / scrollable view

700 px / scrollable view

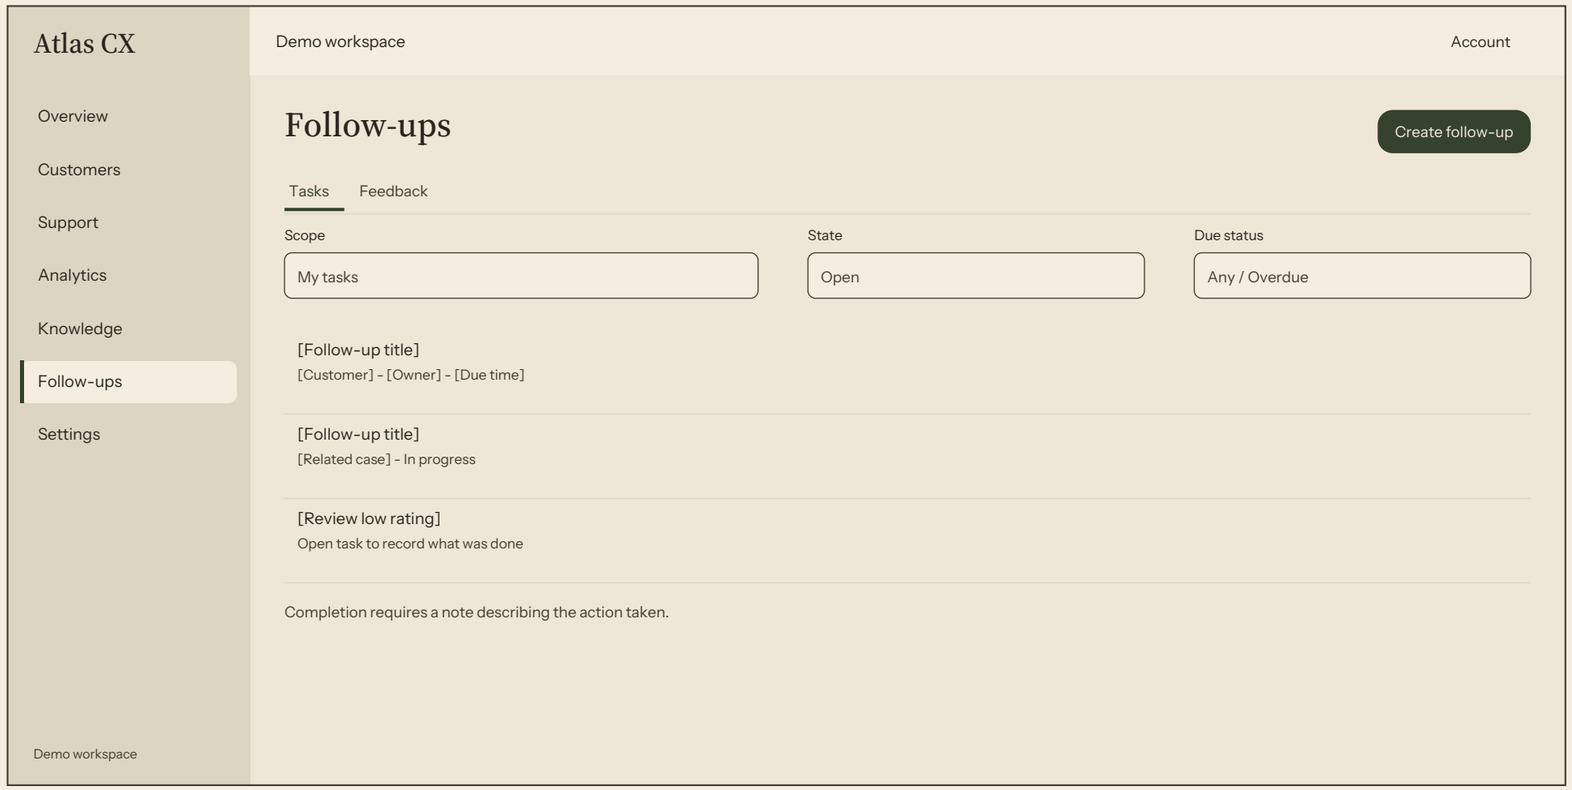

390 px / scrollable view

Feedback and Follow-ups

1440 px / scrollable view

Layout notes

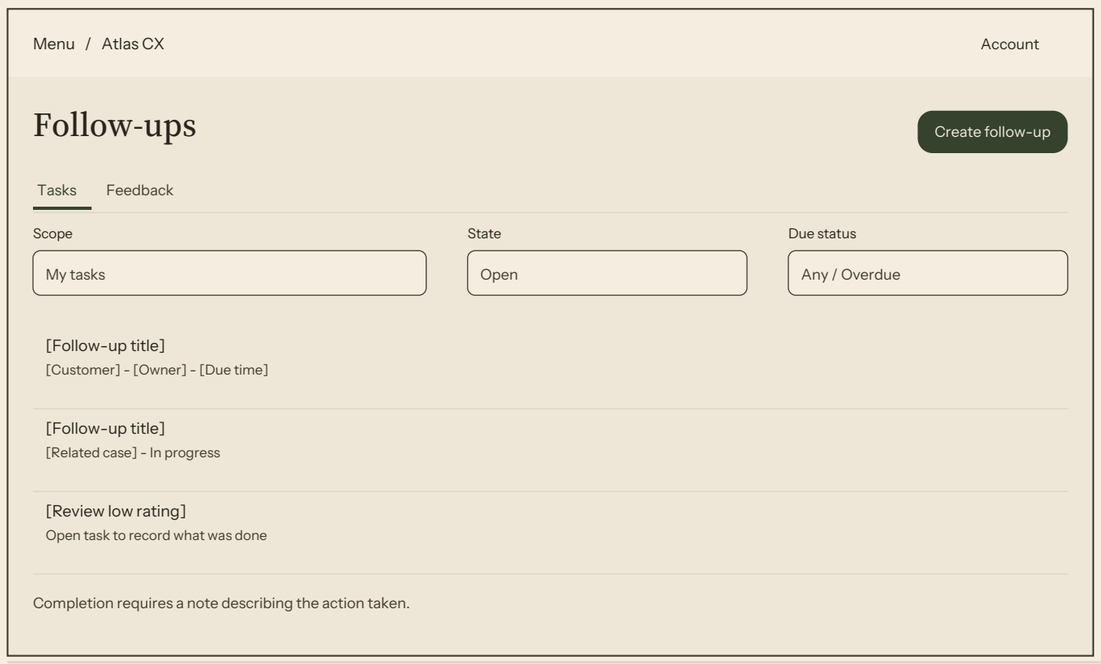

01 Tasks and feedback are linked views.

02 Completion requires What was done?

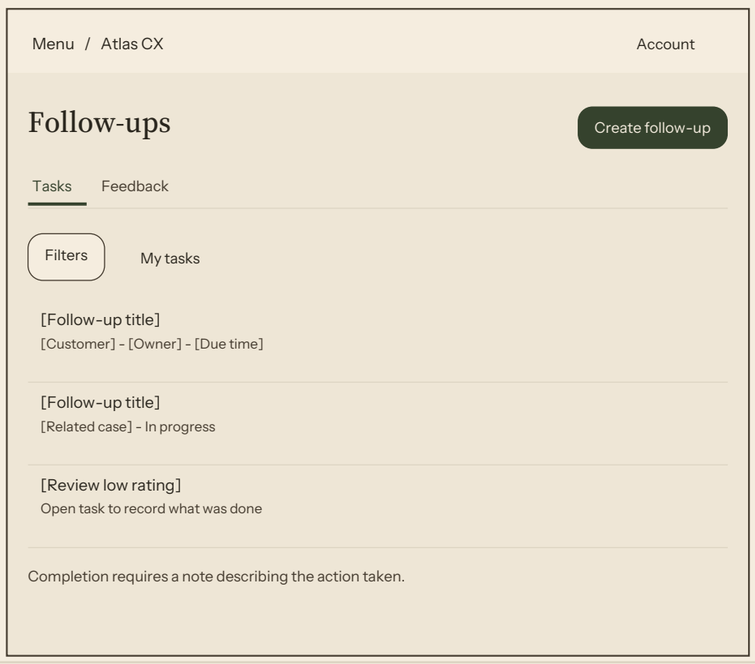

03 Due times, owners and related cases are visible without hovering.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

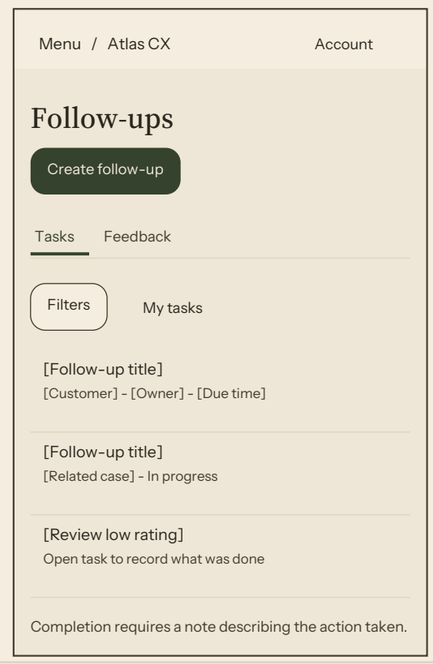

1024 px / scrollable view

700 px / scrollable view

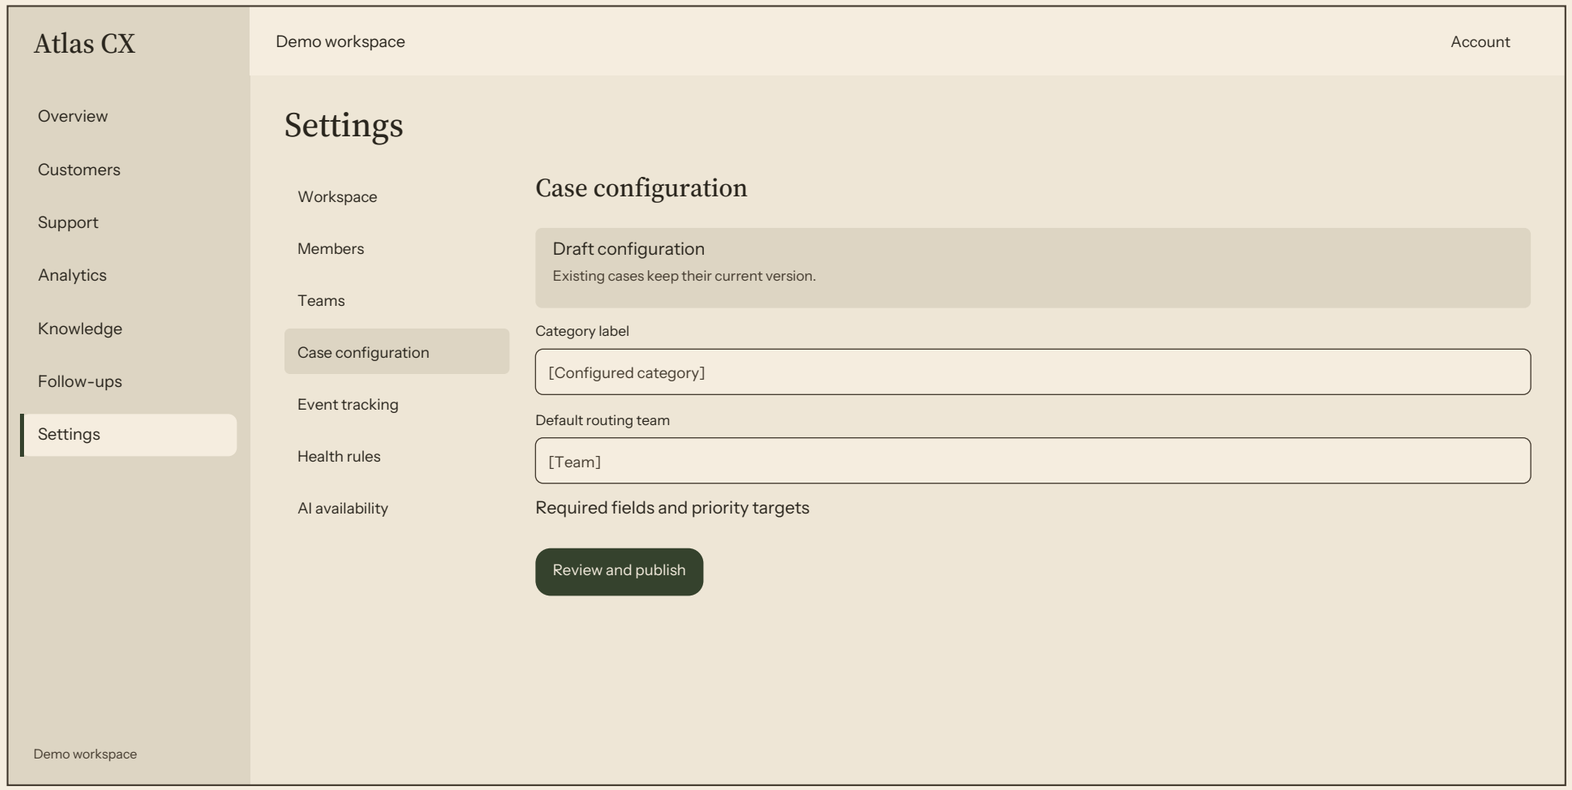

390 px / scrollable view

Settings

1440 px / scrollable view

Layout notes

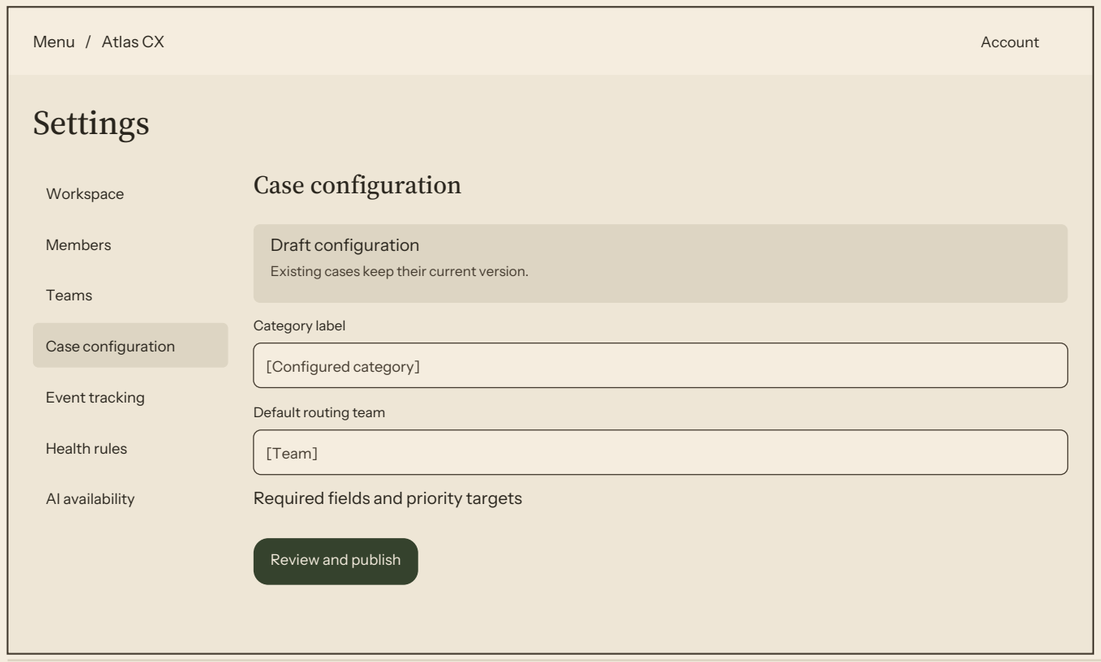

01 Version review explains impact on new and existing cases.

02 Narrow screens use index-to-section navigation.

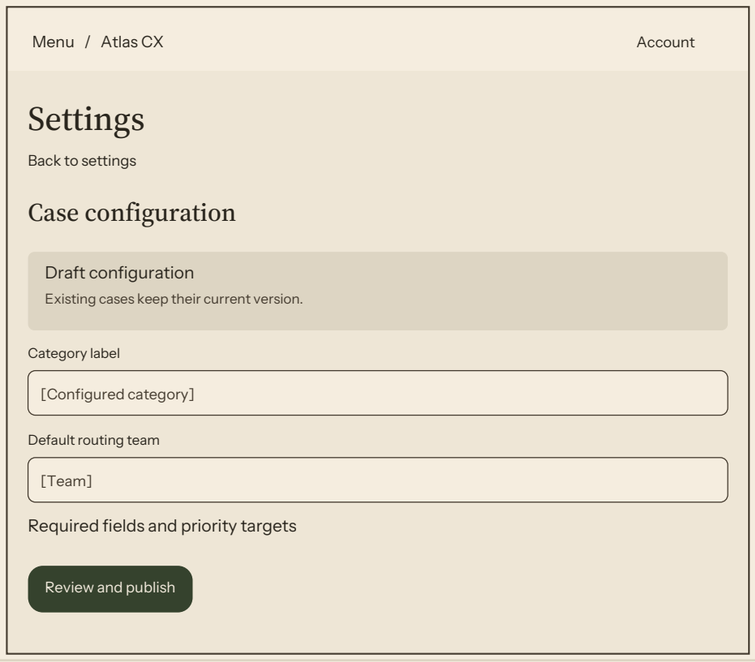

03 Never include real keys or setup links in design screenshots.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

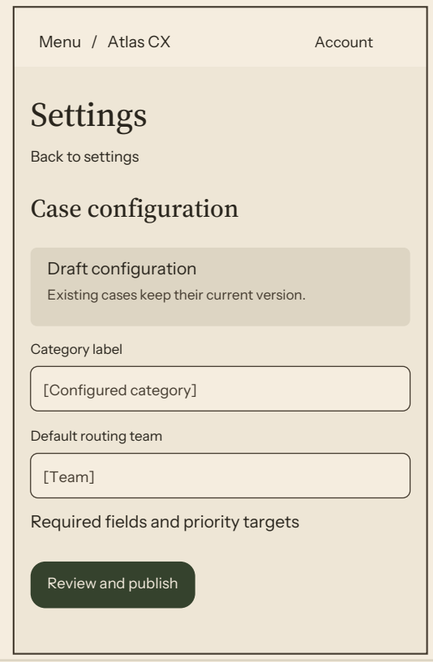

1024 px / scrollable view

700 px / scrollable view

390 px / scrollable view

Public Demo Portal

1440 px / scrollable view

Layout notes

01 Customer-facing, authenticated, provisioned access.

02 Only this contact's public request history appears.

03 Resolved / closed requests replace the normal reply form.

Read with the written UI/UX specification. Labels in brackets are placeholders; values are not business results.

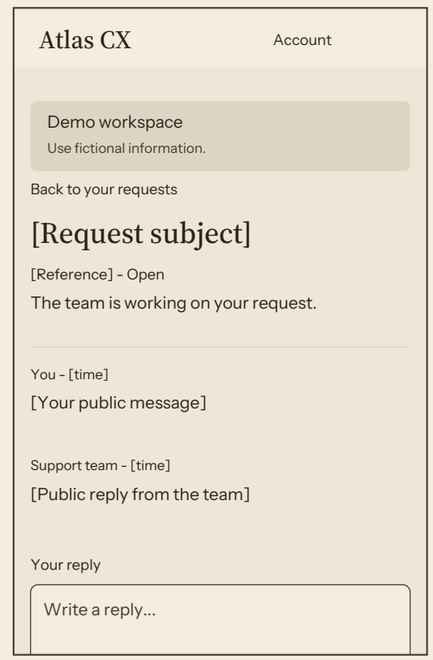

1024 px / scrollable view

700 px / scrollable view

390 px / scrollable view

Shared states and component details

Actions and focus

Send reply

Review sources

Create case

Focus stays outside the control. Exact asymmetric control radii are specified in the written system.

Validation and recovery

What was done?

Describe the completed action

Describe what was done before completing this follow-up.

This case changed while you were editing.

Your draft is still here. Review the latest version.
